ELSEVIER Computational Statistics & Data Analysis 22 (1996) 669–671

COMPUTATIONAL STATISTICS & DATA ANALYSIS

Author Index Volume 22 (1996)

(The issue number is given in front of page numbers.)

Abramovich, F. and **Y. Benjamini,** Adaptive thresholding of wavelet coefficients* (4) 351–361
Baek, J., *see* **H.L. Gray** (2) 137–158
Bates, D.M., *see* **Y.-W. Soo** (6) 619–631
Bell, B.M., J.V. Burke and **A. Schumitzky,** A relative weighting method for estimating parameters and variances in multiple data sets* (2) 119–135
Benjamini, Y., *see* **F. Abramovich** (4) 351–361
Beyer, U. and **F. Śmieja,** Data exploration with reflective adaptive models** (2) 193–211
Bose, S., Classification using splines** (5) 505–525
BuHamra, S.S., *see* **Emad-Eldin A.A. Aly** (4) 363–372
Burke, J.V., *see* **B.M. Bell** (2) 119–135
Carling, K., Testing for independence in a competing risks model** (5) 527–535
Chatterjee, S., M. Laudato and L.A. Lynch, Genetic algorithms and their statistical applications: an introduction** (6) 633–651
Chen, Y.-I., S.-S. Cheng and **H.-L. Wang,** Rank-based comparisons of treatments with a control for repeated measures designs* (3) 235–249
Cheng, S.-S., *see* **Y.-I. Chen** (3) 235–249
Cressie, N., *see* **H.-C. Huang** (2) 159–175
Ding, C.G., On the computation of the distribution of the square of the sample multiple correlation coefficient (4) 345–350
Efromovich, S., Adaptive orthogonal series density estimation for small samples* (6) 599–617
Emad-Eldin A.A. Aly and **S.S. BuHamra,** Rank tests for two change points* (4) 363–372
Fang, K.-T., *see* **J.-X. Pan** (1) 71– 87
Fisk, M., *see* **H.L. Gray** (2) 137–158
Gastaldi, T., *see* **S.S. Gupta** (4) 373–393
Granville, V., Discriminant analysis and density estimation on the finite d-dimensional grid* (1) 27– 51
Gray, H.L., J. Baek, W.A. Woodward, J. Miller and **M. Fisk,** A bootstrap generalized likelihood ratio test in discriminant analysis* (2) 137–158
Gupta, S.S. and **T. Gastaldi,** Life testing for multi-component systems with incomplete information on the cause of failure: a study on some inspection strategies** (4) 373–393
Hayter, A.J. and **W. Liu,** Exact calculations for the one-sided studentized range test for testing against a simple ordered alternative (1) 17– 25

* Appeared in Section II
** Appeared in Section III
All others: Appeared in Section I

0167-9473/96/$15.00 © 1996 Elsevier Science B.V. All rights reserved

Hennevogl, W., *see* **G. Tutz** (5) 537–557
Henshall, J.M. and **D.M. Smith,** Iterative refinement of the singular-value decomposition solution to the regression equations (6) 573–582
Hoeting, J., A.E. Raftery and **D. Madigan,** A method for simultaneous variable selection and outlier identification in linear regression* (3) 251–270
Huang, H.-C., and **N. Cressie,** Spatio-temporal prediction of snow water equivalent using the Kalman filter* (2) 159–175
Hung, H.-Y., *see* **W.-Y. Poon** (3) 303–322
Iglewicz, B., *see* **K.-S. Kwong** (3) 271–285
Juárez-Cerrillo, S.F., *see* **M.M. Ojeda** (6) 583–597
Khuri, A.I., H.J. Kim and **Y. Um,** Quantile plots of the prediction variance for response surface designs** (4) 395–407
Kim, H.J., *see* **A.I. Khuri** (4) 395–407
Klein, J.P., *see* **Y.-H. Li** (2) 177–192
Kundu, D. and **G. Murali,** Model selection in linear regression* (5) 461–469
Kwong, K.-S. and **B. Iglewicz,** On singular multivariate normal distribution and its applications* (3) 271–285
Lai, D., Comparison study of AR models on the Canadian lynx data: a close look at BDS statistic** (4) 409–423
Laudato, M., *see* **S. Chatterjee** (6) 633–651
Li, Y.-H., J.P. Klein and **M.L. Moeschberger,** Effects of model misspecification in estimating covariate effects in survival analysis for small sample sizes* (2) 177–192
Lim, T.-S. and **W.-Y. Loh,** A comparison of tests of equality of variances* (3) 287–301
Liu, W., *see* **A.J. Hayter** (1) 17– 25
Loh, W.-Y., *see* **T.-S. Lim** (3) 287–301
Lynch, L.A., *see* **S. Chatterjee** (6) 633–651
Madigan, D., *see* **J. Hoeting** (3) 251–270
Manteiga, W.G., C.S. Sellero and **M.P. Wand,** Accuracy of binned kernel functional approximations (1) 1– 16
Miller, J., *see* **H.L. Gray** (2) 137–158
Moeschberger, M.L., *see* **Y.-H. Li** (2) 177–192
Murali, G., *see* **D. Kundu** (5) 461–469
Ng, P.T., An algorithm for quantile smoothing splines (2) 99–118
Ogden, T. and **E. Parzen,** Data dependent wavelet thresholding in nonparametric regression with change-point applications* (1) 53– 70
Ojeda, M.M. and **S.F. Juárez-Cerrillo,** Biplot display for diagnostic in a two-level regression model for growth curve analysis (6) 583–597
Pan, J.-X. and **K.-T. Fang,** Influential observation in the growth curve model with unstructured covariance matrix* (1) 71– 87
Parzen, E., *see* **T. Ogden** (1) 53– 70
Piepho, H.-P., Weighted estimates of interlaboratory consensus values* (5) 471–479
Poon, W.-Y. and **H.-Y. Hung,** Analysis of square tables with ordered categories* (3) 303–322
Raftery, A.E., *see* **J. Hoeting** (3) 251–270
Rehman, S.U. and **A. Shapiro,** An integral transform approach to cross-variograms modeling (3) 213–233
Śmieja, F., *see* **U. Beyer** (2) 193–211
Schenker, N. and **J.M.G. Taylor,** Partially parametric techniques for multiple imputation** (4) 425–446
Schumitzky, A., *see* **B.M. Bell** (2) 119–135
Sellero, C.S., *see* **W.G. Manteiga** (1) 1– 16
Shapiro, A., *see* **S.U. Rehman** (3) 213–233
Smith, D.M., *see* **J.M. Henshall** (6) 573–582

Soo, Y.-W. and **D.M. Bates,** Multiresponse spline regression* (6) 619–631
Steel, S.J., *see* **J.H. Venter** (5) 481–504
Taylor, J.M.G., *see* **N. Schenker** (4) 425–446
Tutz, G. and **W. Hennevogl,** Random effects in ordinal regression models** (5) 537–557
Um, Y., *see* **A.I. Khuri** (4) 395–407
Venter, J.H. and **S.J. Steel,** Finding multiple abrupt change points* (5) 481–504
Wand, M.P., *see* **W.G. Manteiga** (1) 1– 16
Wang, H.-L., *see* **Y.-I. Chen** (3) 235–249
Wilcox, R.R., Confidence intervals for the slope of a regression line when the error term has nonconstant variance* (1) 89– 98
Woodward, W.A., *see* **H.L. Gray** (2) 137–158
